

# Analyzing tweets! (Zachary Sherman)

- I analyzed my own most recent 199 tweets.
- I learned that:
  - Since joining Twitter in October 2015, I've liked 45,621 tweets (that's ~29 tweets per day!)
    - I need to get out into the world occasionally...
  - I tweet mostly helper/filler words like “I”, “the”, and “to”.
  - 23.9% of the words in my tweets are considered “positive” by VADER, while 5.2% are considered “negative” and 70.9% are considered “neutral”.
